

CentrAlign Technologies Inc. — IT Security & Data Governance

Information Security Management System | ISO/IEC 27001 Aligned

Department	Information Technology & Security
Document ID	SEC-GOV-2026-09
Classification	Internal Enterprise Confidential
Lead Architect	David Miller, Lead Security Engineer

1. Multi-Factor Authentication & Password Rules

All enterprise accounts require hardware-backed FIDO2 MFA. Passwords must contain a minimum of 16 characters and undergo automated rotation flags every 90 days.

2. Incident Severity Classification & SLAs

- CRITICAL (P1): Production outage, data breach, or security compromise. Response SLA: 30 minutes. 24/7 coverage.
- HIGH (P2): Core business workflow degraded with no workaround. Response SLA: 2 hours.
- MEDIUM (P3): Individual employee blocker with workaround. Response SLA: 8 hours.
- LOW (P4): General IT inquiry or routine hardware request. Response SLA: 24 hours.

3. Access Rights & Privilege Escalation

Administrative access to production databases and ERP financial ledgers requires role-based access control (RBAC) sign-off from IT Security. Dormant accounts inactive for 45 days are automatically disabled.
